Education

Dr. D.Y. Patil Institute of Technology, Pimpri.

B.E in Artificial Intelligence and Data Science, CGPA: 8.91/10

2023 – 2027

Pune, Maharashtra

Mane's International School, Ratnagiri.

HSC (CBSE Board), Percentage: 87%

2022

Ratnagiri, Maharashtra

Saint Thomas School, Ratnagiri.

SSC (State Board), Percentage: 93.40%

2020

Ratnagiri, Maharashtra

Experience or Position Of Responsibility

Technical Head – AWS Cloud Club

- Led the technical initiatives of the AWS Cloud Club by organizing workshops, technical sessions, and hands-on events on cloud computing and emerging technologies.
- Mentored members on AWS services, project development, and technical problem-solving while fostering collaborative learning.

Projects

Denoise-X: AI-Powered Medical X-Ray Enhancement System

- Developed an AI-powered medical image enhancement system for chest X-rays using deep learning techniques to improve image quality and diagnostic visibility.
- Implemented image denoising and contrast enhancement pipelines to reduce noise while preserving clinically significant anatomical features.
- Built an interactive web application for real-time X-ray upload, processing, and visualization, enabling side-by-side comparison of original and enhanced images.
- Secured **3rd Prize** in a college-level hackathon for delivering an innovative healthcare-focused AI solution.

AI-Powered Personal Cloud Storage with Smart Search and Categorization |

- Built an AI-powered cloud file management platform using **Python** and **Flask**, enabling users to upload, organize, and retrieve files through secure RESTful APIs.
- Integrated the **Google Gemini API** to implement AI-based file categorization, semantic search, and automatic tag generation.
- Designed a **PostgreSQL** database schema using **SQLAlchemy ORM** for efficient user and file metadata management.
- Implemented secure authentication using **Flask-Login** and integrated **AWS S3** for scalable cloud storage.

Full Stack Food Delivery Web Application

- Developed a full-stack food ordering platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, featuring a customer interface, admin dashboard, and backend services.
- Designed and implemented RESTful APIs for authentication, product management, cart operations, and order processing with secure **JWT-based authentication**.
- Created and managed **MongoDB** schemas using **Mongoose** for users, food items, carts, and orders to enable efficient data handling.
- Integrated **Stripe Payment Gateway** and implemented end-to-end order lifecycle management from placement to delivery.

Technical Skills

Programming Languages: C++, Python, Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, JavaScript, Leaflet.js

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT Authentication, Stripe API

Databases: MongoDB, PostgreSQL

Cloud & DevOps: AWS S3, Docker, Git, GitHub, MongoDB Atlas, Postman, VS Code

AI: Generative AI, Agentic AI LangGraph, LLMs, Prompt Engineering, RAG

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Achievements

Achieved a **1600+ LeetCode Rating** and solved **500+ Data Structures and Algorithms** problems.

Won **3rd Prize** in a college-level hackathon for developing **Denoise-X**, an AI-powered medical X-ray enhancement system using deep learning.

Maintained a strong academic record with a **CGPA of 8.91/10** in Artificial Intelligence & Data Science.
